

TOUMI AMAL

2nd Year Business Computing Student | Business Intelligence Specialization

Sousse, Tunisia | amaltoumi099@gmail.com

INTERNSHIP OBJECTIVE

Second-year Business Computing student (Licence Informatique de Gestion, BI specialization) seeking an internship in Business Intelligence, Data Engineering, or Software Development. Experienced in data warehouse design, ETL pipelines, UML modeling, and full-stack web development. Eager to apply academic knowledge in a professional environment and contribute to real-world data and software projects.

EDUCATION

Student in Business Computing — Business Intelligence *Present (2nd Year)*

Higher Institute of Management of Sousse (ISG Sousse)

Relevant coursework: Multidimensional Modeling & Data Warehousing, Business Intelligence, Database Design, Web Development, Software Engineering (UML/UP), Algorithms & OOP

ACADEMIC PROJECTS

Data Warehouse Engineer — E-Commerce BI System — Academic Project *2025 – 2026*

- Designed and implemented a star-schema data warehouse (PostgreSQL) for e-commerce analytics, with a central Ventes fact table and 4 dimension tables (Client, Produit, Temps, Commande).
- Built a full ETL pipeline using Python, pandas, and pygramETL (Extract from Kaggle dataset, Transform via data cleaning/audit, Load with upsert-safe dimension and fact table loading).
- Defined and computed KPIs: total revenue (CA), average basket, customer satisfaction distribution, and sales growth trends.
- Developed a multi-chart Matplotlib dashboard (bar charts, scatter plots, histograms) connected live to the PostgreSQL DWH.
- Documented the full BI process: dimensional model, ETL description, data quality audit, KPI catalog, and dashboard presentation.

UML Modeler — Unified Process — HR Management System (SGRH) — Academic Project *2025 – 2026*

- Produced a complete UML artifact suite following the Unified Process (UP) methodology: use case diagrams, class diagrams, sequence diagrams (boundary/controller/entity), and deployment diagrams.
- Modeled HR business processes including employee management, payroll, leave requests, and recruitment, with generalization/specialization hierarchies and formal use case specifications.
- Used IBM RSA for diagram production; designed abstract classes, enumerations, and interfaces following OOP best practices.

Full-Stack Web Developer — CityCare — Municipal Complaint Platform — Academic Project *2025 – 2026*

- Built a PHP / MySQL multi-role web application (citizen / agent / admin) with PDO, session-based authentication, and PHPMailer for automated email notifications.
- Designed a normalized relational schema (utilisateur, reclamation, categorie, historique_statut, service) and implemented complaint auto-assignment and status tracking logic.
- Applied Agile/Scrum with Sprint-based delivery, burndown charts, and formal UP use case documentation.

TECHNICAL SKILLS

Languages & Web: Python, PHP, SQL, JavaScript, HTML/CSS

Data & BI: PostgreSQL, MySQL, pygramETL, pandas, Matplotlib, Power BI, Star Schema, ETL Pipelines, KPI Design

Tools & Platforms: IBM RSA, StarUML, Git, XAMPP, Jupyter Notebook

Methodologies: Unified Process (UP), UML, Agile/Scrum, MVC, OOP, Multidimensional Modeling

CERTIFICATIONS & TRAINING

Mobile Development (Flutter) — 9antra.tn × IEEE ESSTHS Student Branch | 2-Day Mobile Dev Bootcamp | April 17–18, 2026

Digital Twins & Industry 4.0 — IEEE IAS ESSTHS / ISI / ISSAT SBCs | Innosphere Virtual Summit | Includes AI/ML integration & Cybersecurity for smart industrial systems

LANGUAGES

Arabic: Native

French: Advanced (C1) — Academic language of study

English: B1 Certificate — Amideast | C1 — EFSET
